EDUCATION

B.E. – Electronics & Communication Engineering

BLDE College of Engineering, Bijapur

2025

CGPA: 7.5 / 10

PG Program – Data Science & Analytics

IMARTICUS Learning

July 2025 – June 2026

EXPERIENCE

Data Science Intern (Python)

The LearnHUB | Remote

Oct 2023 – Dec 2023

- Performed end-to-end data cleaning, EDA, and feature engineering on real-world datasets using Python, Pandas, and NumPy; reduced data inconsistencies by identifying and handling missing values and outliers.
- Built and evaluated classification and regression models (Random Forest, Logistic Regression, Linear Regression) achieving consistent accuracy above 80%; documented model performance metrics (Accuracy, F1, R²).
- Presented data-driven insights and visualizations using Matplotlib and Seaborn to stakeholders; communicated findings in structured reports with actionable business recommendations.

GenAI / AI Developer Intern

DigiConsultium | Remote

Feb 2026 – Ongoing

- Developed full-stack web application using React.js and Firebase.
- Integrated Google Gemini API for LLM-based response generation.
- Implemented Role-Based Access Control (RBAC) and user authentication.
- Built RESTful API endpoints and managed NoSQL database architecture.
- Performed data parsing and bulk data ingestion from structured file formats.
- Developed automated report generation and real-time alert mechanisms.

PROJECTS

Super Store Sales Dashboard – Power BI Capstone | *Power BI Desktop · DAX · Excel · Power Query*

- Built a 3-page interactive Power BI dashboard analyzing 5,901 US retail transactions (\$1.56M sales, 2019-2020) across 49 states, uncovering profit leakages and delivering 7 actionable business insights.
- Created 7 custom DAX measures (Profit Margin %, Avg Delivery Days via AVERAGEX+DATEDIFF, CALCULATE+ALL() for filter-independent KPIs) and cleaned data in Power Query by removing empty columns and validating 1,098 negative profit records.
- Identified Tables sub-category as biggest loss-maker (-\$11,092 despite high sales) and implemented 15-day Sales & Profit forecasting.

Loan Approval Prediction | *Python · Scikit-learn · Streamlit*

- Designed a full ML pipeline using Random Forest Classifier on applicant income, credit history, and property data to automate loan approval decisions.
- Handled missing values, encoded categorical features, and serialized the trained model using Pickle for production-ready use.
- Deployed a live Streamlit app enabling real-time loan eligibility predictions.

PPE Safety Compliance Detection System | *Deep Learning*

- Tools: Python, TensorFlow, Keras, OpenCV, Scikit-learn
- Achieved 89% test accuracy on 6-class PPE detection (Helmet, Gloves, Safety Vest, Fire Spark) using a fine-tuned CNN model.
- Resolved class imbalance via class-weight balancing and data augmentation; built a real-time OpenCV inference pipeline for live video compliance checking.

TECHNICAL SKILLS

Programming Languages: Python, SQL

ML / Data Science: Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn

ML Models: Random Forest, Logistic Regression, Linear Regression, Decision Tree, CNN, Boosting, YOLO

Data Analytics & BI: Power BI, DAX, Power Query, Excel

Deployment: Streamlit, Pickle

Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, Git, GitHub

CERTIFICATIONS

- Oracle Cloud Infrastructure 2024 AI Foundations Associate – Oracle
- Data Analytics Job Simulation – Deloitte Australia (Forage)
- Data Science with Python – The LearnHUB
